

Poetry.

The Sentry's Fatal Shot.
A true incident of a long ago Indian campaign, by Olinde G. Dodge (New Haven).

The tale was told at close of day,
By the firelight of a copper gray,
Whose bronzed face pale, though the ruddy
firelight,
On the blazing campfire sparkled bright,
As he told the tale of "Borot Camp."
While the prairie mists came and went,
And the giv'er worms crept and crawled,
For the true toad called from the entwined
bough.

As his words rocked to the night wind's
sough,
So the trooper told his truthful tale
To the Indians of the quiet glade,
While his comrade listened with bated
breath.

To that terrible story of war and death,

"Two many a year ago," he said,

"And to the Indians of the quiet glade,

"We were from the north of the rebel war,
And rank and their bridges bare,

When they ordered us up to the Kanawha line,

To break the strength of the Sioux combine,

We pursued and I fought where the burning

forest did not wait its way of death;

Where the shrieking Kaw with its curled tide,

Swung suddenly past, the sun left his side,

Our camp fires shone by many a stream,

As we followed the savage trail,

Our squadrons beat their grim bridle back,

Yet still their boughs on front and flank,

Though our tired steeds grew lean and lank;

At night though, they never lay,

As the serpent crawled in many a way,

With a scorpion's sting in his fangs stand,

With scorpion claws in his fingers stand,

Or dreams of home lay him strayed

Into the glare by the camp fire made.

Then the wights of an arrow's flight,

And a hawk which carries the sun's pale rays—

And a hawk which they sought for prey,

But forest at length to stand at bay.

They faced our front an instant's time,

When farther back it was last sight do,

Wary of danger and wary of war,

Our sentry stood on his watchful stern;

Let not your sleep on this post tonight,

If he wakes to welcome the morning light."

The wild watch was done, and a friendly tree

Seemed spreading its arms to shelter me,

For it did not stand alone, but in a pair,

One above the other, and shamed the light.

When just as the stars told the hours of one,

I heard through the darkness a soft step come.

The gloom increased, the still wall

Gently gleamed of the growing pale.

With a light step, a step so near to near,

Bringing my sleep to a ready and aim

I listened to catch the sound again.

The moments passed. I scarcely breathed,

Till I thought the fainting fancy waked,

When gradually the fainting fancy right

Leveled and died—Oh, God! the strain!

That rose in the shadow still haunts my dream.

A woman's shriek the night and bane,

Filling my soul with grief and bane,

Never to sleep again to see

And so this awful mystery.

And there upon the blood-stained grass,

Whose blues felt that you lie here,

Lay, with her heart-bled, dying red,

The emerald mother, young and fair,

And four-odd boy, her toting care,

Who slept on that gay forest bane,

Unconscious in a peaceful rest,

Our eyes were filled with sleep,

Our hearts full of sleep, too,

Our limbs, too, full of sleep,

Traveler's Directory.

Only \$2.00
TO NEW YORK
(for first class limited tickets)

VIA

Fall River Line.

Steamers PRUDENCE and PROVIDENCE
in commission. Leave Newport weekday at
8 A. M. Mondays, at 10:30 P. M., due in New
York at 3:30 A. M. Connection with boat
for Brooklyn and New York.

Steamers LEADER and PROVIDENCE
leave New York, from 24th N. M., foot of Murray Street, at 5:00
P. M. daily. Sundays included. American
connection from Brooklyn, 1:30, Jersey City, 4:15
P. M. Eastward steamer touch at Newport at
8:30 A. M.

A boat train between Fall River and
Newport, leaving steamer wharf, Fall River
at 8 A. M.

A ringing noise
In the ears, headache, deafness, eyes
weak; obstruction of nose, dis-
charges falling into throat, sometimes
profuse, watery and acrid, at
other, thick, tenacious, bloody and
putrid; offensive breath; smell and
taste impaired, and general debility.
Not all of these symptoms at once.
Probably only a few of them.

That's Cataract.

A medicine that by its mild,
soothing, cleansing and healing
properties has cured the most hopeless
cases. One that will cure you,
no matter how bad your case or of
how long standing. A medicine
that doesn't simply palliate for a
time, but produces perfect and permanent
cures.

That's Dr. Sage's Cataract Remedy.
A cash payment of \$500, not by
you, as you might expect, but to
you, if you can't be cured. It's an
offer that's made in good faith, to
prove their medicine by responsible
men, the proprietors of Dr. Sage's
Remedy.

That's the kind of medicine to try.
Doesn't it seem so?

The Mercury.

AND P. RALPH, Editor and Proprietor

SATURDAY, OCTOBER 10, 1891.

EDITORIAL NOTES

It is probable that the present Mayor of Providence will be renominated. He has made a good Mayor and the Republicans cannot do better than try him again.

Tacoma wants the Democratic National Convention and now San Francisco is trying to get the Republican Convention to meet within her borders. Nothing modest about these requests.

In Pawtucket Wednesday night in Republican caucus every ward was carried in favor of David J. White for Mayor. This looks like a complete walkover as far as the nomination is concerned.

The Republicans in Pawtucket hold their convention to nominate a candidate for Mayor to-day. The Democrats will probably nominate ex-Mayor Carroll, the great Democratic boss in the northern part of the State.

A new electric railroad is to be built soon to run from Providence, through the village of the Pawtucket to Phenix, and perhaps will be extended to other places. Hon. John H. Campbell of the Pawtucket Valley Gleaner is President of the new corporation. Electric roads will be very numerous in Rhode Island in time. The horse railroad is a thing of the past.

There is joy in the Cleveland household. Mrs. Cleveland has a little girl baby. This has made the Western Democracy so happy that at a Democratic convention in Kansas last week the following telegram was sent to Mr. and Mrs. Cleveland:

"The Democracy of Alchison County, a convention assembled, congratulates you upon the birth of your daughter."

Parnell is dead. The great Irish leader died at his home in Brighton, Tuesday, after an illness of only four days. Had his death occurred a few years ago he would have been mourned by a nation, and it might have had a very disastrous effect on the Irish cause. Since the O'Shea scandal Parnell's influence in Irish affairs has been very slight.

Mr. Edison says he has got up a system for street railways by which the current can be taken directly from the rails, thus doing away with the trolley system. It is to be hoped that he is right, as such an invention will do away with the only serious objection to the use of electricity on street railways—overhead wires. Mr. Edison is also building a big electrical locomotive, for which the current is to be taken from stations twenty miles apart, and which is to be used on some Western road.

The Senate committee to investigate the cost of living is now in session in New York. If it carries out its design it will gather full data for estimating the influence of the tariff on the welfare of the people. Senator Carlisle, one of the Democratic members, says the investigation will be conducted as far as possible from the standpoint of the consumer. That would not be thorough work. As nearly every consumer is also a producer of some kind, the effect upon the producer is as important as that upon the consumer, without taking into consideration many questions of public policy involved in the encouragement of domestic industry.

The Democratic State Central Committee has opened headquarters at the old U. S. recruiting office in Providence, where the journal says, "They will hold forth individually and more or less collectively till further notice." Their first attempt at business appears from the same authority, to have stirred up a mass at once. At the meeting Wednesday some one offered a resolution that the Providence Democracy be requested to nominate either Ziba O. Slocum, D. L. D. Granger, Richard B. Comstock or Wm. K. Potter for Mayor. This resolution, coming from an outsider, made the Providence members mad and hence the effort at harmony was not a success.

The Providence Telegram is getting to be a first-class blatherskite. When it cannot find men enough in the Republican party to malign it turns its attention to its own party. Just now the vials of its wrath are stirred up over Mayor-elect Honey of Newport and Mayor Pond of Woonsocket, with McNally of Providence thrown in as a scarecrow. It calls them the three arch conspirators in the Democratic camp and proceeds to tell what direful things will happen if they do not come into the Telegram fold at once and obey orders. Fortunately for the gentlemen named the Telegram has no influence anywhere, either in its own party or outside of it, so it will be hardly worth while for any one to take the trouble to reply to its false statements. But when it insinuates, as it does in its last Saturday's editorial, that Col. Rouye was elected Mayor of Newport by the aid of ex-Gen. Wetmore's money, it makes itself the subject of laughter by all who know the two gentlemen, and knew the personal feelings they have for one another, to say nothing of the political feeling. Probably the two ablest men in the Democratic party in this State to-day are Col. Honey and Mayor Pond, and their election to the highest offices in the cities where they below attest their popularity. Perhaps the Telegram is jealous of that popularity and is afraid they will carry off some of the honors that it desires for its pet.

Councilman J. C. Coggeshall has gone on a three-weeks' Western trip. Mrs. Coggeshall accompanied him as far as New York, where she is visiting her sister.

Herman Oelrich has resigned from the Democratic State committee in New York. He does not like Tammany.

GOOD WHISKEY

has come to be a necessity in the home. The G. O. Taylor Old Fashioned Pure Rye Whiskey can be depended upon for both cut and fill. Either brand can be obtained leading druggists or grocers. See that our firm name is on each label and over the cork in each bottle. CHESTER E. GRAY & SON, Sole Proprietors, Boston, Mass.

A Great Ship Canal.

The great ship canal in process of construction, uniting the North Sea with the Baltic, has attracted very little attention in this country. It was begun in 1887, when the initial step in that work was celebrated by the old Emperor William. For more than three centuries the project of cutting a canal across Schleswig-Holstein had been discussed. It could not be undertaken as a private enterprise, or, at least, was not, on account of the cost. But for years ago Germany and Russia having come to a full understanding, the work was undertaken. The former constructs the canal, the latter paying a little less than one-third of the cost.

At the present rate of construction it will require not less than two years to finish the work, it being, by estimate, about half done at the present date. The estimated cost is \$37,000,000. The canal is sixty miles long. It will be noted that the excavation is longer by many miles than that required either for the Panama or Nicaragua canals, while the estimated cost is not nearly so great. For nine miles of the German canal the excavation will be to the depth of ninety-five feet, while for another distance of fifteen miles the excavation required will vary from forty-five feet to 100 feet.

The comparatively low cost of the work is one of the most interesting facts. Is the difference in the price of labor, or in the more economical prosecution of the work under the supervision of the German government? Seven thousand men will be prosecuting the work for the next four years, when the great ship canal, sixty miles long, 136 feet wide and carrying twenty feet of water at low tide, will take the great commercial fleet across what was once the Danish peninsula. It is estimated that 9,000,000 tons of shipping will annually pass through this ship canal.

While Russia pays a little less than one-third of the cost, the proportion being one for the latter to two and two-tenths for Germany, the latter will control the management of the canal, and in time of war it will be closed to all Russian war-ships. The canal will unite the seaports of Wilhelmshaven, on the Baltic, Conant Johnson, of Hamburg, in a recent report, stated that this canal "will prove to be strategically and commercially one of the events of the century." At just about the time this great North Sea and Baltic canal is completed there ought to be a record of the completion of the Nicaragua canal, which will be of still greater importance both for strategical and commercial purposes.

Who is Governor?

The Legal Controversy in Connecticut, as to who is Governor, promises to be soon settled. The counsel for the two sides have agreed to abide by the decision of the Supreme Court on a single point. This point is whether the Legislature has the right to correct the returns of the Moderator. By this action a speedy settlement is possible, and a decision may be reached by November, before the incoming of the Legislature. The counsel were unanimous in acquiescence to the terms of agreement. The Republicans have agreed to withdraw Gov. Bulkeley's answer to the complaint of Judge Morris, and the Democrats withdraw the reply to Gov. Bulkeley's answer, leaving the case standing merely upon a demurral to the complaint on the part of the Republicans.

If there is one thing more than any other for which this present administration deserves praise it is in the general excellence of the President's appointments. The opposition papers have uniformly filled all vacancies for him beforehand with the most objectionable persons in the party, but when the President has got ready the ones actually appointed show that he knows how to select the right man for the right place.

In several of the thickly-settled provinces of Russia the local authorities have provided for grain for food and sowing until January; after that famine will be imminent, according to present prospects. These provinces have ample communication by river or rail with the world's markets, and it is incredible that famine will be permitted to ravage a population of several millions. There is no time enough given to enable relief measures to be taken.

The Providence Telegram is getting to be a first-class blatherskite. When it cannot find men enough in the Republican party to malign it turns its attention to its own party. Just now the vials of its wrath are stirred up over Mayor-elect Honey of Newport and Mayor Pond of Woonsocket, with McNally of Providence thrown in as a scarecrow. It calls them the three arch conspirators in the Democratic camp and proceeds to tell what direful things will happen if they do not come into the Telegram fold at once and obey orders. Fortunately for the gentlemen named the Telegram has no influence anywhere, either in its own party or outside of it, so it will be hardly worth while for any one to take the trouble to reply to its false statements. But when it insinuates, as it does in its last Saturday's editorial, that Col. Rouye was elected Mayor of Newport by the aid of ex-Gen. Wetmore's money, it makes itself the subject of laughter by all who know the two gentlemen, and knew the personal feelings they have for one another, to say nothing of the political feeling. Probably the two ablest men in the Democratic party in this State to-day are Col. Honey and Mayor Pond, and their election to the highest offices in the cities where they below attest their popularity. Perhaps the Telegram is jealous of that popularity and is afraid they will carry off some of the honors that it desires for its pet.

The Providence Journal is now devoting its time to abusing Secretary Blaine because he does not return to Washington and take charge of the Chilian campaign. Just as if he could not just as well attend to all his duties in Maine as in Washington.

Councilman J. C. Coggeshall has gone on a three-weeks' Western trip. Mrs. Coggeshall accompanied him as far as New York, where she is visiting her sister.

Herman Oelrich has resigned from the Democratic State committee in New York. He does not like Tammany.

GOOD WHISKEY

has come to be a necessity in the home. The G. O. Taylor Old Fashioned Pure Rye Whiskey can be depended upon for all business transactions, and financially able to carry out any obligation made by their firm. Wm. T. Tax, Wholesale Druggist, Toledo, O.

Hall's Catarrh Cure Internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75c per bottle. Sold by all druggists.

(From the Woonsocket Reporter.)

It is untrue.

Not content with admitting to its culprits anonymous communications declaring the city officials of Woonsocket to be a gang of thieves, the Providence Telegram has begun a tomahawk and bludgeon crusade against Mayor Daniel B. Pond. In the same issue of the Telegram in which our city government was so grossly maligned and insulted there appeared a more direct personal attack on his honor, the Hon. D. B. Pond, charging him and two others with conspiring to injure the democratic party for the benefit of himself. The specific charge is this:

last Saturday Mayor-elect Honey of Newport, Maynard, Woonsocket and James

McNally were collecting together at one of the hotels in the city. Yesterday the trio had another conference and the purpose

can be summed up by just showing the state as they made it up.

At the present rate of construction it will require not less than two years to finish the work, it being, by estimate, about half done at the present date. The estimated cost is \$37,000,000. The canal is sixty miles long. It will be noted that the excavation is longer by many miles than that required either for the Panama or Nicaragua canals, while the estimated cost is not nearly so great. For nine miles of the German canal the excavation will be to the depth of ninety-five feet, while for another distance of fifteen miles the excavation required will vary from forty-five feet to 100 feet.

The comparatively low cost of the work is one of the most interesting facts. Is the difference in the price of labor, or in the more economical prosecution of the work under the supervision of the German government? Seven thousand men will be prosecuting the work for the next four years, when the great ship canal, sixty miles long, 136 feet wide and carrying twenty feet of water at low tide, will take the great commercial fleet across what was once the Danish peninsula. It is estimated that 9,000,000 tons of shipping will annually pass through this ship canal.

While Russia pays a little less than one-third of the cost, the proportion being one for the latter to two and two-tenths for Germany, the latter will control the management of the canal, and in time of war it will be closed to all Russian war-ships. The canal will unite the seaports of Wilhelmshaven, on the Baltic, Conant Johnson, of Hamburg, in a recent report, stated that this canal "will prove to be strategically and commercially one of the events of the century." At just about the time this great North Sea and Baltic canal is completed there ought to be a record of the completion of the Nicaragua canal, which will be of still greater importance both for strategical and commercial purposes.

Who is Governor?

The Legal Controversy in Connecticut, as to who is Governor, promises to be soon settled. The counsel for the two sides have agreed to abide by the decision of the Supreme Court on a single point. This point is whether the Legislature has the right to correct the returns of the Moderator. By this action a speedy settlement is possible, and a decision may be reached by November, before the incoming of the Legislature. The counsel were unanimous in acquiescence to the terms of agreement. The Republicans have agreed to withdraw Gov. Bulkeley's answer to the complaint of Judge Morris, and the Democrats withdraw the reply to Gov. Bulkeley's answer, leaving the case standing merely upon a demurral to the complaint on the part of the Republicans.

If there is one thing more than any other for which this present administration deserves praise it is in the general excellence of the President's appointments. The opposition papers have uniformly filled all vacancies for him beforehand with the most objectionable persons in the party, but when the President has got ready the ones actually appointed show that he knows how to select the right man for the right place.

The Hazard Memorial, an elegant edifice built by Rowland and John N. Hazard as a memorial of their father, the late Rowland G. Hazard, and given by them to the village of Peace Dale, was dedicated yesterday with proper ceremonies. The building cost something over \$30,000.

Mr. Geo. William Curtis, the original and boss mugwump of the country, says that he shall vote the Republican ticket this fall.

The trial of Alvey, the Murderer, N. H., murderer, will begin at Plymouth on Tuesday, Nov. 17.

At a regular meeting of Provident Lodge No. 20, Knights and Ladies of Columbia, Wednesday night, it was unanimously voted to settle all bills and disband. There were twenty-five or thirty certificates of the order held in Newport the first of the present month, but the fate of the short-term endowment orders has so frightened the holders that it is doubtful if there be a half dozen by the first of next month.

Prof. Wilson, of Brown University, gave the first lecture on constitutional history in the local University Extension course Thursday. There was a good attendance of members of the Centre, the committee room of the Clarke street school being well filled, and the discourse was listened to with great interest.

The marriage of Mr. John H. Swinburne, son of Mr. Geo. W. Swinburne, and Elizabeth, daughter of Mr. Richard Thomas, is announced for the 22d instant.

Miss Black, daughter of Mr. and Mrs. John Black, has had as a guest this week Miss Minnie Thomson, of Brooklyn.

Superintendent of Hucks Denman has been in New York this week on police business.

Mrs. Chambers and Miss Kate Friend are visiting friends in Providence.

How's This?

We offer One Hundred Dollars reward in any case of catastrophe to be cared for taking care of the same. The G. O. Taylor Old Fashioned Pure Rye Whiskey can be depended upon for both cut and fill. Either brand can be obtained leading druggists or grocers. See that our firm name is on each label and over the cork in each bottle. CHESTER E. GRAY & SON, Sole Proprietors, Boston, Mass.

WASHINGTON MATTERS.

New York Politics as Talked in Washington—The Chinese Question—The First Sugar Beets Grown in California—The Fight Against Dogs. Maxim-Nestor.

(From our regular Correspondent.)

WASHINGTON, D. C., Oct. 8, 1891.

The President does not have quite so many callers, or rather, there are not so many prominent men among his callers since the announcement was semi-officially made that none of the important appointments were likely to be made until after the Fall election. Whatever the reason for this decision it is universally considered to be good politics on the part of the President, besides it gives him time to look after some other important matters that are pending.

There is a very marked difference in the manner in which republicans and democrats here talk of the outlook in New York. The democrats invariably start off with an "If" which they admit to be necessary to Flower's success. On the contrary the republicans grow more enthusiastic every day and will not admit that there is even a possibility of defeat for Fassett, and the reports from private sources which reach here from New York are constantly adding to the republican confidence.

The President has taken a hand in the Chinese question and he has spoken with the same earnestness which characterized his instructions to Minister Egan last week, to demand satisfaction from the Chilian junta for affronts offered him as the official representative of the United States. A Chilian who recently entered the United States through Canada was arrested and deported to China. The British Minister, because the Chilian claimed he had been born in Canada, requested the President to pardon him and allow him to return to Canada. To this the President replied through the State Department "that if this were a single case it would be great pleasure to show this government's consideration by complying with the request, but there is involved in this case, in my opinion, the whole question of the success and enforcement of our exclusion acts. I have therefore directed the Secretary of the Treasury to send this man back to China."

The first payment on account of the sugar bounty was six thousand eight hundred dollars, and it was paid to the Chino Valley Sugar Company of California, for the production of three hundred and forty thousand pounds of beet sugar.

As it is now certain that Secretary Blaine will not be in Washington on the date set for the conference between himself and the President and the Canadian Commissioners on the subject of reciprocity—October 12—the British Minister has been notified of the necessity for postponing the conference. No new date has been fixed for the conference, and there are many people who doubt whether it will be held until there shall be a change in administration in Canada.

Secretary Tracy is considering a report made by a committee of Naval Officers which recommends a revolution in the personnel of the service which would probably amount to an entire reorganization of the navy. It is approached the recommendations in his annual report to the President.

Senator Dolph, of Oregon, says the Farmer's Alliance is trying to obtain a foothold in his State but so far has been unsuccessful. Senator Wolcott, of Colorado, says the Alliance cuts no figure in his State.

Hon. Jeff. Chandler, of Missouri, a

Democrat who wanted to succeed in the Senate, but whose name was somehow lost in the shuffle by the Democratic legislative caucus, is here. He says the only hope of the Democrats next year is to come out squarely for free coinage. It is needless to add that he is not going on the stump for his party in New York or Massachusetts.

The fight against Gen. Raum is again raging violently here, and those who are conducting it seem determined to keep it up as long as he remains at the head of the Pension Office. Gen. Raum has gone to Illinois on a fifteen day's leave of absence and his enemies insist that he will not return to Washington as Commissioner of Pensions, notwithstanding his having just before leaving that much as he might like to lay down the harassing duties of the office, which he did not seek, he would not resign while under fire. These men insist that Secretary Noble will not dismiss the three employees of the Pension Office who have made difficulties charging Gen. Raum's son with Office Brokerage, whose discharge Gen. Raum has asked for. It is a nasty business altogether, and Gen. Raum has the sympathies of all who have taken the trouble to ascertain that politics is the only basis of the fight against him.

The number of candidates for the single Democratic vacancy on the Interstate Commerce Commission continues to increase at the rate of three or four a day, and they are mostly from the South since it was announced that only those from that section would be considered.

To enjoy sound digestion and vigorous health, use Adams' Tutifruit after meals. It never fails to aid digestion.

A BAD HUMOR CURED.

65,000 Expended on Doctors and Medicine without avail. Gave himself up to Die.

Good W.M. suggests Cuticura Home-
dies. Uses them 7 months, and
is entirely cured.

I was in the war during 1863-4, and took a
heavy cold at Gettysburg, from which I never
fully recovered. In 1875, I took a cure
from Cuticura, which seemed
impossible to cure. I tried all the famed doctors
I could find, but to no avail. I expended a
sum five thousand dollars trying to find a
cure, but could not, and finally giving myself
up to die. Cuticura was suggested to me, which
I was so extremely satisfied with, and used. I
followed her suggestion, and am happy to say
by diligent application of your Cuticura
Remedies for seven months, I
cured, after spending a sum of time and
money, which I would not have spent, and
will today. Not many who may call on me
will tell anyone who may call on me my
experience.

C. G. PEARSALL,
1 Fulton Fish Market, New York.
April 18, 1891.

Cuticura Remedies.

These grateful to millions tell the story of great physical suffering, of meet anguish, of
of torture, and pain, and misery end-
ed in Cuticura Remedies, the greatest
Skin Cures, Blood Thrillers and Humor Remedy
the world has known.

CUTICURA REMEDY, the new Blood and
Skin Purifier, internally purifies the blood
and purges the skin, removes all
Cuticura, the great Skin Cure, and Cuticura
an exquisite Skin Purifier and Beauty-
fertilizer, to close the skin and heal
and restore the hair, cure every disease
of the skin, such as, acne, loss
of hair, freckles, etc., also, from plagues to
soot, the best physicians, hospitals,
and all other remedies fail.

Sold everywhere. Price, CUTICURA, 90c;
Box, 25c; REMEDY, 81c. Prepared by the
PARKER HOME AND CHEMICAL CORPORATION,
Boston.

Send for "How to Cure Skin Diseases,"
60 pages, illustrations, and 100 testimonials.

PARKER, blackheads, red, rough, chapped,
and oily skin cured by Cuticura SOAP.

NO RHEUMATISM ABOUT ME!

In one minute the Cuticura Au-
to-Plaster removes the
rheumatism, the grippe, the muscular
inflammation, the cold, and only
instantaneous pain killing strengthening plan-

No more
of this!

Nearly \$2,000,000 of fractional silver coin
was put into circulation last month.

The Old Colony railroad station at
Middletown, R. I., was destroyed by fire.

Capitalists are said to be buying up all
the rice mills in the country with a view
to consolidation.

Vaude Velté, the Belgian explorer, died
on board a steamer returning from the
Congro Free State.

Three persons were burned to death in a
tenement-house fire in New York, and two
others badly burned.

A special town meeting in Athol, Mass.,
\$20,000 was appropriated to build and
furnish a new high school house.

A freight wreck occurred on the western
division of the Boston and Maine railroad
at North Berwick, Me. Several cars were
wrecked.

James Early, a laborer on the Flushing
railroad at Worcester, Mass., was killed
by an engine on the Boston and Maine
railroad, at a street crossing.

Plotting at a lecture by George French's
Trial in New York caused him to de-
nounce the American people and renounce
all public appearances for the future.

James Bresnahan of Holyoke, Mass., got
off a freight train at Fitchburg while it
was in motion, fell under the wheels and
had his right leg crushed. He will
probably die.

O. S. Cormier, a French lawyer of Man-
chester, N. H., who made an authorized
settlement for \$2000 in a client's case a
week ago, left the city with the money,
was arrested at Rochester, N. Y.

The pulp mill at Augusta, Me., de-
pendent on water power, was obliged to
shut down on account of low water. The
Keene electric light power plant, for
the same reason, resorted to steam power.

Wednesday, Oct. 1.

Dr. Briggs' trial for honesty is to begin
Nov. 4.

Snow, sleet and cold are reported from
South Dakota.

Another rumor is afoot that Secretary
Noble has resigned.

Bishop Talbot declines the Episcopal
bishops of Georgia.

The Phillipsburg (Pa.) bank has been
forced to close its doors.

Town Clerk Chesley of Rochester, N. H.,
is said to have absconded.

There was a broad riot and shooting by
soldiers in Zawitka, Poland.

Relics of the battle of Lund's Lanes
were uncovered at Niagara Falls.

Owing to the recent disturbances, the
pew will receive no more pilgrims.

Three persons were killed and one badly
injured at a railroad crossing on State
Island.

There was a devastating hurricane in
the northern pines of Minnesota.

Special Justice James M. Davis of the
Milford (Mass.) district court is dead.

Campus Pedro is reported on route from
Cuba to Washington with important docu-

ments.

The Margaret Pillsbury hospital has
been formally presented to the city of Cor-
ton, N. H.

A daily yield of 15,000 barrels is being
made from an oil well in Washington
county, Pa.

A preacher was sentenced to one year's
imprisonment at Reading, Pa., for fraud-
ulently obtaining money.

Patrick Lynch was killed while work-
ing in the Boston and Albany freight
yard at Springfield, Mass.

A dispatch special from Luverne, Minn.,
says it is snowing there, and work in the
fields has been suspended.

The death of Clara Burgess at New Bedford,
Mass., has caused the arrest of several
persons for criminal malpractice.

Mountain's noted trotting stallion, Ta-
polo, owned by Fausto French, was pol-
ished on the race track at Miles City, Mont.
He was valued at \$10,000.

Ex-President Cleveland has sent the New
York Democratic leaders to thinking by a
warning that they must work harder than
ever to carry the state this fall.

Thursday, Oct. 2.

Trinity was beaten by Yale at football,
33 to 6.

E. E. Moore of Union, Me., was found
hanged in the street.

Henry S. Gamble of Salem, Mass., was
killed by falling from a train.

The death of Chief Engineer James Hart-
ter, U. S. N. S., is announced.

Secretary Foster has rescinded the rule
imposing duty on imports of gold.

John L. Sullivan's theatrical combina-
tion is stranded in Australia.

The Minnesota supreme court holds a
"future delivery" grain contract to be
void.

The death of George W. Ladd took
place on board his steam yacht at Pro-
vidence, R. I.

A nickel steel freight weighing twenty-five
tons was cast at the Carnegie works at
Pittsburgh.

There is a statement that many Presby-
terian churches in New York city are in
need of pastors.

Miss Frank Leslie was married at New
York to William C. Kingsbury Wilde, M.
A., of London, eldest son of the late Sir
William Wilde, M. D., of Dublin.

Monday, Oct. 5.

Mr. and Mrs. Gladstone will pass the
winter in Florence.

The death is announced of Vincent Vela,
the Italian sculptor.

The Savannah strike is ended, so far as
handling the work goes.

Professor Elmer of the weather bureau
thinks the rain-producing experiment a
failure.

Dr. C. Irving Fisher, superintendent of
the state almshouse at Tewksbury, Mass.,
has resigned.

The steamer Orion ran into the schooner
D. F. Briggs off Cape Cod and towed her
back to Boston.

Mrs. Cleveland, wife of ex-President
Cleveland, gave birth to a baby girl. Both
are doing well.

New York Chinamen are manufacturing
opium for smoking purposes, in defiance
of the revenue law.

United States deputy marshals are said
to be on the trail of the smuggling of Chinamen
over the Canadian border.

The steamship Levante of the Wilson
line encountered a cyclone, and lost Chief
Officer Yates and a seaman.

The Earl of Portsmouth died suddenly
from the bursting of a blood vessel. Vis-
count Lytton succeeds to the earldom.

Reverend George Coyer, aged 74, died
in his carriage in the town of Boston, R.
I., while en route to Lebanon to attend a
funeral.

Miss Georgia Thompson, a 19-year-old
girl of Newport, R. I., pleads guilty to a
charge of infanticide, and implicates a
married man.

The Ulster County Savings Institution,
Kingston, N. Y., was robbed of \$48,000
by its treasurer and assistant treasurer.
Both have been arrested.

Tuesday, Oct. 6.

The residence of August Belmont in
New York was destroyed by fire. Loss
\$20,000.

Fire at the H. B. Smith company's found-
ry, at Wausau, Mass., caused a loss of
nearly \$40,000.

The chief of police of Rochester, N. H., is
charged with being in league with
gangsters.

Specific appropriation for the Boston
navy yard is to be asked for of the next
congress.

The Spanish consul at Boston makes an
appeal for the recent sufferers by the
Spanish floods.

Three New Yorkers have been arrested
while selling "green" goods to a Holyoke
(Mass.) man.

The bodies of four of the miners buried
in the Richardson mine in Pennsylvania
have been recovered.

A representative of English capitalists
is in Chicago, ready to close up the pro-
posed stockyard deal.

The excessive rain in the northwest has
interfered greatly with threshing, and
caused considerable loss.

The schooner Erna was wrecked on Sandy
Hook. The crew was saved by
means of the breeches buoy.

Timothy Sullivan of East Providence, a
baker, fell from a car near Kingston,
R. I., and was instantly killed.

Detective O'Malley was discharged at
New Orleans on the indictments found
against him for bribery of jurors.

London employers of riverside labor
have given notice that the men must do
the work assigned them or be discharged.

A verdict of \$700 has been entered
against the New York, New Haven and
Hartford Railroad company for steam
stoves in passenger cars.

During a carnival parade in Kansas
City, a cable car crashed into a crowd
and injured nearly thirty persons, several
of whom may die.

A writer to a Russian paper characterizes
the French pro-Russian feeling as super-
ficial, being dictated by an unconquer-
able dread of Prussia.

A fatal wreck occurred on the Albany
and Susquehanna railroad at Dye's Switch,
near Binghamton, N. Y., the engineer
being killed with his hand on the throttle.

Pretty Fair Work.

STOCKTON, Cal., Oct. 3.—In exercising
the kite-shaped track Marvin drove
his car half a mile in 100, and jogged a full
mile in 212. He speeded her only on
the first half mile. Palo Alto trotted
around the kite-shaped track in exercise in
212 1/2. His record is 212 1/2 in a race.

Relics of the battle of Lund's Lanes
were uncovered at Niagara Falls.

Owing to the recent disturbances, the
pew will receive no more pilgrims.

Three persons were killed and one badly
injured at a railroad crossing on State
Island.

Farm and Family

The Best Clover Seed.

Many good farmers make more money from the seed of the second growth of the clover than from the hay. And this profit is too often missed and lost for want of a little enterprise. It is but a little work to save \$20 worth of clover seed, and for the greater part, this is lost for want of picking it up. It is thought by some that, by leaving the seed on the ground this will be stocked for a future time and without any labor. It may be, but at what a cost! A fairly good yield of seed is four or five bushels per acre, and this is worth \$20 to \$25. This is more than can be made of the aftermath in any other way. Home-grown seed is preferred by every farmer who may see how it is free from the common weeds that are too often contained in the market seed. The seed takes but little from the soil, and as the roots of the clover have the largest quantity of nitrogen that is contained in the crop, the seed may well be spared. If the farmer is anxious to preserve the fertility of his land the money made from the seed will procure a ton of good superphosphate, and this will be worth many times the manorial value of the seed.

In the harvesting of a crop of clover seed, there are a few points to be observed with care. The seed is contained in a pod, from which its family name, Leguminous, is derived; for all the plants that produce seed in this manner are rich in a substance that contains a large proportion of nitrogen, and is known as legumin. This pod is tough and not easily broken. It must be rubbed off in the cleaning of the seed. It is, therefore, desirable to not this tough covering as much as possible, and this is done by exposing the cut clover to the weather, that the alternate wetting and drying may disintegrate the fibres of the pod. After this has been done, so that the seed is easily rubbed out between the hands, the clover is ready for threshing, which is best done at once.

Autumn and Winter Feed.

It is now that the milk of cows will be failing, and the dairyman who has neglected to provide some supplementary food for his animals will suffer the results of the neglect of his proper business, says the N. Y. Times. The pastures are hard and ripe, except where they have been well managed; the manure dropped on them scattered, the rough spots and bunches of herbage mown, and some fertilizers applied. Even then the benefit of a change of feeding will be found most useful in keeping up the flow of milk. Milk comes from the food, and from such food as the elements of the milk go into a digestible form. The digestibility of the food is quite as important as the composition of it. Of what avail are the elements of the food if the cow's stomach cannot get them out of it? A piece of wood may contain every element that is needed for the subsistence of an animal, and, while a bear can get fat on wood and bark, a cow is not made that way. And much of the food now being given to the cows is no more nutritious than the wood of a tree.

The owner of a field of corn fodder, so planted that it will have many ears on the stalks, is the contented and happy man. And his cows are happy, too. His milk is not subject to constipation, and himself to punishment and obloquy, because it is too poor for legitimate sale and healthful use. If he has a silo to store the surplus of the crop planted for the purpose, so much the better; the winter is provided for, and this cheap food insures good and satisfactory profits from his well managed business. On the whole, the silo is a great aid to every farmer, whether he be a dairyman or not. But the dairyman must depend upon it he cannot do as well by one-half without it. And he who for any reason has not yet provided himself with one may find opportunity to do so now if no time is lost. The economy of it has been proved by several years of use, and the most profitable results of it.

Farmers' Investments.

Forehanded farmers will have more money to invest this winter than ever before. As a rule it is the big promise of the interest—the promise, be it observed, and not the reality of it very often—that reduces the uncaring investor. A circumstance that is pertinent happened recently in England in regard to one of the so-called industrial companies, of which late so many have been organized for the purpose of the disposal of their business by the promoters. A prominent brewery company had been organized at the enormous sum of \$3,000,000. Of this capital a large part has gone into the hands of farmers, as has been the case with several similar enterprises that have been organized on this side of the ocean. The large dividend that had been promised and expected a year ago was not forthcoming, and there is great wailing among the investors.

Many million dollars have been invested by American farmers in enterprises of similar kinds which have been very promising, but very disappointing. Great Western loan companies have absorbed vast amounts of money furnished by eastern farmers, who have probably been induced to it by the fact that the money was lent to other farmers. But the fact that these borrowing farmers have paid large bonuses to the agents and ruthless interests was overlooked. And now the lands thus mortgaged have been abandoned, in large part to the creditors and are not worth one-half of the debts. The results must be disastrous, and although the coming winter there will be many of these

ORIGINAL NO. 2.

Flannel Cakes.

By NELLIE CAMPBELL BIFFORD.

Four cups flour; one-half cup shortening; four eggs; one-half teaspoonful salt; two level teaspoonsfuls; two cups milk; one teaspoonful oil; two level teaspoons. Cleveland's Baking Powder. Beat the yolks and whites of the eggs separately. Mix the flour, meal, salt and baking powder, add the milk, egg yolks and melted butter and beat hard. Stir in the fully beaten whites and bake on a hot griddle.

Our only Cleveland's baking powder proportions are made for that.

If cake dries out, gets husky, crumbly, or tasteless like bakers bread, it isn't bad luck but bad baking powder.

Cake keeps moist, keeps its natural flavor when made with Cleveland's Baking Powder. One special excellence of Cleveland's

debts paid, there will still be millions of money that will never come back to the original owners. It is far better to loan money at home at five per cent, where the security can be seen, than to get ten per cent, a few thousand miles away, and leave the disposal of the money to entire strangers who are most intent on making profits for themselves.

Agricultural Science.

For years back it has been believed by agricultural chemists that plants did not derive any of their nitrogen from the atmosphere, but all of it from the soil. While this was a subject quite beyond the ability of practical farmers to test, yet they were very sceptical of accepting a conclusion that their own practical in the field tends to cast doubt upon. Many of the most accomplished and intelligent farmers gave the subject much thought and arrived at a directly opposite belief from that of the scientific people. The writer as long as a dozen or more years mentioned in these columns some facts in regard to the culture of corn on very poor land, which led him to believe that this plant at least was not wholly dependent on nitrogenous fertilizers for the large amount of nitrogen in the crop. Prof. Atwater, then worthily filling the high position of chemist to the Connecticut College, was led to believe the same from the results of his observations. All these statements, however, were received by the almost unanimous voice of the scientists with ridicule, not from what they themselves knew, but from the way they had made up their minds. But now an overwhelming mass of testimony has been gathered, by which it is shown that plants, or at least many of them, do derive their nitrogen from the atmosphere, and not necessarily any of it from the soil; that is, directly, and as they gather the nutrient elements of their food. Elsewhere will be found a short statement of the subject as it now stands, and every intelligent reader will perceive how this advanced science is most closely related to the best practice of the best farmers and justifies their methods which they have long practiced, not scientifically but from a knowledge of the results of this best practice. And now the scientific students corroborate justly the farmers' work. —[N. Y. Times.]

Household Fancy Work.

KNITTED PALM-LEAF EDGE.

This beautiful pattern really pays one for the time spent on it.

Use two balls No. 80 Finlayson, Bonefield's real Scotch. When thread, white comes in balls, two No. 17 or 18 steel needles. Do not work too tightly, but so the needle will slip along easily.

Cast on 34 stitches, knit across plain once. [Knit plain, p. secun in narrow.]

1st row—Slip 1, knit 2 (over 2, pur 2 together), twice, knit 12 (over 2, pur 2 together) twice, knit 2, over, narrow, knit 1, over, knit 2, over, narrow, 2, over, 2, pur 2 together.

2d row—Over 2, pur 2 together, knit 4, knit 4 of the loop, knit 5 (over 2, pur 2 together) twice, knit 4, slip 4, pur 4 stitches across, 1, knit 8, (over 2 pur 2 together) twice, knit 3.

3d row—Slip 1, knit 2 (over 2, pur 2 together) twice, knit 6, knit 4 of the loop, knit 2 (over 2, pur 2 together) twice, knit 3, over, narrow, knit 6, over, narrow, over 2, pur 2 together.

4th row—Over 2, pur 2 together, knit 4, knit 4 of the loop, knit 5 (over 2, pur 2 together) twice, knit 4, over, narrow, knit 3, over, narrow, over 2, pur 2 together.

5th row—Over 2, pur 2 together, knit 4, knit 4 of the loop, knit 5 (over 2, pur 2 together) twice, knit 6, knit 4 of the loop, knit 2 (over 2, pur 2 together) twice, knit 3, over, narrow, knit 6, over, narrow, over 2, pur 2 together.

6th row—Over 2, pur 2 together, knit 4, knit 4 of the loop, knit 5 (over 2, pur 2 together) twice, knit 6, knit 4 of the loop, knit 2 (over 2, pur 2 together) twice, knit 3, over, narrow, knit 6, over, narrow, over 2, pur 2 together.

7th row—Over 2, pur 2 together, knit 4, knit 4 of the loop, knit 5 (over 2, pur 2 together) twice, knit 6, knit 4 of the loop, knit 2 (over 2, pur 2 together) twice, knit 3, over, narrow, knit 6, over, narrow, over 2, pur 2 together.

8th row—Over 2, pur 2 together, knit 4, knit 4 of the loop, knit 5 (over 2, pur 2 together) twice, knit 6, knit 4 of the loop, knit 2 (over 2, pur 2 together) twice, knit 3, over, narrow, knit 6, over, narrow, over 2, pur 2 together.

9th row—Over 2, pur 2 together, knit 4, knit 4 of the loop, knit 5 (over 2, pur 2 together) twice, knit 6, knit 4 of the loop, knit 2 (over 2, pur 2 together) twice, knit 3, over, narrow, knit 6, over, narrow, over 2, pur 2 together.

10th row—Over 2, pur 2 together, knit 4, knit 4 of the loop, knit 5 (over 2, pur 2 together) twice, knit 6, knit 4 of the loop, knit 2 (over 2, pur 2 together) twice, knit 3, over, narrow, knit 6, over, narrow, over 2, pur 2 together.

11th row—Slip 1, knit 2 (over 2, pur 2 together) twice, knit 6, slip 4, over 1, over, knit 6 (over 2, pur 2 together) twice, knit 3 (over 2, pur 2 together) twice, knit 6, over, narrow, knit 3, over, narrow, over 2, pur 2 together.

12th row—Over 2, pur 2 together, knit 4, knit 4 of the loop, knit 5 (over 2, pur 2 together) twice, knit 6, knit 4 of the loop, knit 2 (over 2, pur 2 together) twice, knit 3, over, narrow, knit 6, over, narrow, over 2, pur 2 together.

13th row—Slip 1, knit 2 (over 2, pur 2 together) twice, knit 12 (over 2, pur 2 together) twice, knit 8, over, narrow, knit 1, over, narrow, over 2, pur 2 together, knit 3.

14th row—Slip 1, knit 2 (over 2, pur 2 together) twice, knit 6, knit 4 of the loop, knit 2 (over 2, pur 2 together) twice, knit 6, over, narrow, knit 3, over, narrow, over 2, pur 2 together.

Right of all in Leavening Power.—U. S. Gov't Report, Aug. 17, 1889.

Royal Baking Powder

ABSOLUTELY PURE

ABOUT COUNTY

FORTSM. UTE.

An addition to the "Oakland Farm" stable is being built by Mr. Charles Burdick, of Newport.

On Wednesday afternoon, the long drought was broken by the commencement of a rain which lasted through the night, replenishing the cisterns, but not enough to start the springs.

State News.

Twenty-seven new pupils have entered the State Agricultural School at Kingston, making the total number in attendance fifty.

Prudence is nobly extending its park system, and improvements are being made all the time at Roger Williams Park. The new manager has recently received a tiger and a buffalo from Central Park, New York. The tiger is very beautiful. Miss Stacy was an exemplary member of these societies, and also of the Christian Church. She had been a very patient sufferer, from consumption, for many months.

Mr. J. J. Van Allen's coach horses are to be called for through the coming winter by Mr. Josiah C. Gifford, at "Vaucluse Farm."

Archie B. Chase, son of Constant C. Chase, fell and broke his elbow arm between the elbow and wrist. Dr. Benjamin Green reduced the fracture.

Mr. George P. Anthony who has been home sick with a slow fever is gradually getting well.

A ten schooner 152 feet over all is to be launched in East Providence—the first event of this kind in Providence harbor for many years. The keel for another schooner will be laid at the yard soon.

The Wilkins Tigers, or first separate company of the Connecticut national guard, from New Haven, were the guests of the First and Second separate companies, R. I. M., in Providence, Tuesday and Wednesday. All three companies are composed of colored men. There was a parade and review by the governor Tuesday afternoon, banquet in the evening and general shooting by the visitors Wednesday.

East Greenwich Academy is now free from debt, thanks to the labor and energy of its principal, Rev. F. D. Binkley. The last \$200 was raised Oct. 1st, by an appeal to the students themselves, and no institution which has always labored under a heavy load is now free from the embarrassment of debt.

The tax list for the town of South Kingstown this year shows a total valuation of \$4,575,369, an increase of \$162,050 over that of last year.

The best reform in domestic life is without doubt the introduction of Dr. Bull's Baby Syrup. No more indolent need be given to babies.

THE NEWPORT HERALD: FOR THE WEEK ENDING OCTOBER 10, 1891.

WEATHER-CROP BULLETIN.

Results of Observations by the New England Meteorological Society.

CAMBRIDGE, Mass., Oct. 3.—The New England Meteorological Society, co-operating with the United States weather bureau, issue the following bulletin for the week ending Oct. 2:

Another week of generally warm, sunny weather has pushed most crops to maturity, and a great part of the crops are now secured. Very light rains fall over the southern sections on the 29th, but in most of the north not even a trace of rain has fallen during the week. The drought is growing more and more severe, especially in the southeastern half of New England. In southwestern New Hampshire fields and pastures are drying up bodily. The first hard frost of the season was felt on the morning of the 1st. In the south this was generally confined to the low lands and little damage was done because the crops were so generally matured and harvested. The frost was general throughout the north, although the weather of the past few weeks had served to place most crops beyond injury by frost and little damage is reported.

Corn is mostly cut, and the gathering and husking is well under way. A large yield of excellent quality is generally reported. Late potatoes continue to turn out large crops in most places, with only moderate infestations of rot. Fall apples are plenty in most sections, but only southern New England reports anything like an average yield of winter fruit. The cranberry harvest is nearly completed, and an unusually large crop has been secured.

The crop bulletin which will be issued Oct. 10, will be the last for the present season, and the correspondents are respectfully requested to send in full reports on the average yield of the several crops on that week.

SEPTERMBER WEATHER.

Summary issued by the New England Meteorological Society.

CAMBRIDGE, Mass., Oct. 7.—The month of September was warmer and drier than any previous September of which there is any record. In the weather became over the principal agricultural districts east of the Rocky mountains. In New England the mean temperature was from 3° to 6° above the normal, with few excessive ranges or rapid changes. The maximum temperature—from 80° to 90°—occurred generally on the 18th, under clear skies and hot southerly winds, as the sixth cyclone of the month moved slowly from the upper lakes to the St. Lawrence gulf. It gave little or no rain in southern New England, but generated a severe thunderstorm in northern New England that did much damage by wind and lightning. The storm was of short duration and little rain fell.

Light frost occurred on the morning of the 6th, with the general minimum temperature of the month from 39° to 40° in the south and from 40° to 39° in the north. Very little damage was done, some tender vines and plants being slightly injured in the north. The barometric pressure was nearly one-tenth inch above the normal. There were few rainy days and a small amount of precipitation, the latter being considerably below the normal over the greater part of New England. The display of aurora was frequent, and on the 6th was very brilliant. The sunshine and high temperature during the greater part of the month served to forward late crops, and harvesting was well under way throughout New England at the end of the month.

The best reform in domestic life is without doubt the introduction of Dr. Bull's Baby Syrup. No more indolent need be given to babies.

The Wilkins Tigers, or first separate company of the Connecticut national guard, from New Haven, were the guests of the First and Second separate companies, R. I. M., in Providence, Tuesday and Wednesday. All three companies are composed of colored men. There was a parade and review by the governor Tuesday afternoon, banquet in the evening and general shooting by the visitors Wednesday.

East Greenwich Academy is now free from debt, thanks to the labor and energy of its principal, Rev. F. D. Binkley. The last \$200 was raised Oct. 1st, by an appeal to the students themselves, and no institution which has always labored under a heavy load is now free from the embarrassment of debt.

The tax list for the town of South Kingstown this year shows a total valuation of \$4,575,369, an increase of \$162,050 over that of last year.

The best reform in domestic life is without doubt the introduction of Dr. Bull's Baby Syrup. No more indolent need be given to babies.

The best reform in domestic life is without doubt the introduction of Dr. Bull's Baby Syrup. No more indolent need be given to babies.

The Wilkins Tigers, or first separate company of the Connecticut national guard, from New Haven, were the guests of the First and Second separate companies, R. I. M., in Providence, Tuesday and Wednesday. All three companies are composed of colored men. There was a parade and review by the governor Tuesday afternoon, banquet in the evening and general shooting by the visitors Wednesday.

East Greenwich Academy is now free from debt, thanks to the labor and energy of its principal, Rev. F. D. Binkley. The last \$200 was raised Oct. 1st, by an appeal to the students themselves, and no institution which has always labored under a heavy load is now free from the embarrassment of debt.

The tax list for the town of South Kingstown this year shows a total valuation of \$4,575,369, an increase of \$162,050 over that of last year.
